

This is a great cost-effective option that is better than offering just uncovered parking. Forge uses a Cold-Formed Steel (CFS) Design that utilizes light-gauge steel. This storage type provides customers an option that protects their boat/RV from inclement weather and sun. With the CFS design, there is no need to have a foundation slab, as we engineered it to have a Drilled-Pier Footing for each column.

DESIGN OPTIONS:

- Straight or Angled Spaces
- Pull-Through Spaces
- 3-Sided
- End Walls
- Galvalume® or Colored Screw-Down Roof

For more information about getting started on your new custom self-storage facility contact our sales team.
